

## PETITION TO OPPOSE US23/I71 CONNECTOR

We, the undersigned, oppose a freeway connector from US23 to I71 running through Morrow County which employs eminent domain to seize property and destroys communities, homes, and prime farmland.

We urge ODOT and relevant decision makers to explore alternatives which would employ existing transportation corridors which relieve congestion and which enhance economic development without destroying communities, homes, and prime farmland.

We urge our local elected officials to use their influence to communicate their opposition to decision makers.

We demand State Senator Bill Reineke and State Representative Riordan McClain use all available legislative tools to stop such a connector being built in Morrow County.
